

Project ID (1)	Proposer Type	Company Name	For students projects Do you allow other teams to apply for your project?	Project Title	Data Obtainable?	Data Mining Method	Related to Algeria?	⚡	Average Relevance (R)	⚡	Average Feasibility (D)	⚡	Average Added Value (D)	⚡	Average Algerian Content (4)	⚡	Final Mark (20)	All Reviewed Comments
69	ENISA School library			Book Recommendation System and Usage Pattern Analysis	Yes	Clustering, Association rules	Yes		5.80		3.90		4.70		4.00		16.40	
41	Student		Yes	ENISA student performance analytics	Yes	Classification, Anomaly detection, Regression	Yes		5.00		3.83		3.83		3.83		16.40	Reviewer 1: Similar work have been done in the past years' projects Reviewer 2: Duplicated
26	Student	Algérie Poste (Edahabia card / BaridPay)	No	Anti-Fraud Detection for Edahabia / Algerian e-payment transactions	Maybe	Classification, Anomaly detection	Yes		4.83		3.00		4.50		4.00		16.33	Reviewer 1: Need to confirm the availability of the data Reviewer 2: Duplicated
36	Student	Algérie Poste (Edahabia card / BaridPay)	No	Fraud Detection in Algerian E-Payment Systems: Focus on Edahabia and BaridPay	Maybe	Classification, Anomaly detection	Yes		4.83		3.00		4.50		4.00		16.30	Reviewer 1: Need to confirm the availability of the data Reviewer 2: Duplicated
57	Student	Algiers International Airport Houari Boumedienne	Yes	From Check-in to Boarding: Improving Passenger Journeys via Data Analytics	Yes	Regression	Yes		4.83		3.33		4.00		4.00		16.17	Reviewer 1: Good project, but the data should be secured. Reviewer 2: It seems to be more than a data mining project!!!
60	Student		No	Predictive Analysis of Pharmacy Sales and Inventory Management	Yes	Association rules	Yes		5.00		3.67		3.83		3.67		16.17	
27	Student		Yes	Algerian Laptop Market Analysis from Quesdinus data	Yes	Clustering, Association rules, Regression	Yes		4.83		3.75		3.58		3.83		16.06	
7	Company professional	ESMOR		Real Time Drilling Parameters Monitoring using AI	Yes	Anomaly detection	Yes		4.50		3.50		4.00		3.67		16.07	
50	Student		Yes	Fraud Detection in Postal and Financial Transactions at Algérie Poste	Maybe	Classification, Anomaly detection	Yes		5.00		2.38		4.25		4.00		16.63	Reviewer 1: This project should be combined with an Algérie Poste project to ensure data access. Reviewer 2: Data ? Reviewer 3: Duplicated.
31	Student		No	ABX: Algerian Banking Index	Yes	Clustering, Anomaly detection, Regression	Yes		4.50		3.33		3.50		4.00		16.33	Reviewer 1: I think anomaly detection is not a primary task here
33	Student		No	Algerian Forest Fires Analysis and Prediction	Yes	Classification	Yes		4.33		3.33		3.50		3.83		16.00	Reviewer 1: This Work have been done in the past 2 years
44	Student	Delivery societies	No	Data Mining on Customer Behavior and Product Returns Using Delivery Data in Algeria	Maybe	Classification, Clustering	Yes		4.67		2.67		3.83		3.83		16.00	Reviewer 1: If the data is secured from production systems, the project will be very important or maybe a potential Startup idea
12	Company professional	ODRWAIVES		Multimodal DSR Intelligence: Fusing Sensor Streams and Narrative Logs for Automated Activity Classification, Risk Identification, and Procedural Compliance	Yes	Classification, Clustering, Anomaly detection	Yes		4.00		3.25		3.83		3.67		14.75	Reviewer 1: Some parts are not covered in data mining
11	Student		No	Energy Consumption and Renewables in Algeria: Data-Driven Insights for a Sustainable Future	Maybe	Clustering, Regression	Yes		4.17		2.58		3.83		3.83		14.42	Reviewer 1: How can the data be secured? Reviewer 2: It's hard to get algerian data Reviewer 3: Data should be provided for Algerian content
81	Student		No	Fake Review Detection in the Hospitality Industry using Data Mining Techniques	Yes	Clustering, Anomaly detection	Maybe		4.67		3.00		3.83		2.92		14.42	Reviewer 1: I like this project, but the project holder should be innovative in data collection Reviewer 2: Previous projects have been submitted for the same purpose Absence of data
22	Researcher	Center For Development Of Advanced Technologies (CDTA)		AI Model Development for Driving Assessment	Yes	Classification, Anomaly detection	Maybe		4.33		3.50		4.00		2.50		14.33	
61	Company professional	Algérie Poste		Smart Training Management Platform: Automating Corporate Training with AI	Yes	Classification, Clustering, Association rules, Anomaly detection	Yes		4.00		3.17		3.67		3.50		14.33	Reviewer 1: If the platform being analyzed is already in production with many users, this project will be good. Reviewer 2: seems a bit out of scope ? Reviewer 3: It would better to target Stream data (real time analysis)
3	Company professional	Algerian Space Agency (ASAL) – Satellite Development Center		Predictive Modeling of Li-ion Battery Health and Lifetime for Reliable Cubesat Power Systems	Yes	Classification, Anomaly detection, Regression	Maybe		4.33		3.67		3.50		2.67		14.17	
17	Student	Sonatrach	Yes	Predictive Maintenance for Industrial Equipment using Data Mining	Maybe	Classification, Clustering, Anomaly detection	Yes		4.67		2.83		3.33		3.33		14.17	Reviewer 1: Interesting but it will be hard to get the data Reviewer 2: Would be better to datasets from algerian companies Reviewer 3: what about data collection?
59	Student		Yes	Data-Driven Library Optimization and Personalized Book Recommendation System	Maybe	Clustering, Association rules	Yes		4.50		3.50		2.67		3.50		14.17	Reviewer 1: Similar work have been done last year
62	Company professional	Algérie Poste		Enhancement and Evolution of the Interactive Dashboard for Parcel Management and Tracking	Yes	Classification, Association rules, Anomaly detection	Yes		4.00		3.17		3.50		3.50		14.17	Reviewer 1: I wonder if that this project be transferred to a group project, that would be better
88	Student		No	Predictive Analysis of Soil Characteristics for Natural Resource Detection	Maybe	Classification, Clustering, Association rules	Yes		4.50		2.92		3.50		3.17		14.08	Reviewer 1: Data ? Reviewer 2: Absence of data + it would be better the secure data from algerian official institutions
34	Professor			Forecasting UV Index and Assessing Its Health and Environmental Risk	Maybe	Classification, Association rules, Regression	Maybe		4.67		3.58		3.50		2.25		14.00	Reviewer 1: UV data can be collected online, however for the rest of the data students need to collect it either from the internet if available or other sources, they have freedom for this project they need to be creative.
47	Student		Yes	Mining Algerian Social Media Trends using Data Mining Techniques	Yes	Classification	Yes		3.50		3.33		3.33		3.67		13.83	Reviewer 1: The project is good, but you need to find a way to collect the data
63	Company professional	SARL SOMARE COMPANY		AI Solution for Automating and Optimizing HR Tasks	Yes	Classification, Clustering, Association rules	Yes		3.67		3.25		3.50		3.33		13.75	Reviewer 1: Seems out of scope of the course Reviewer 2: not enough details about that project?
8	Student		No	AI Ad Copy Generator for E-commerce	Maybe	Classification, Clustering, Association rules	Yes		4.25		2.92		3.83		3.00		13.58	
2	Company professional	Algérie Telecom		Solution d'automatisation du contrôle de la qualité (pour le raccordement et/ou déplacement de la fibre optique ou autres réseaux)	Yes	Anomaly detection	Yes		3.17		3.00		3.67		3.67		13.50	Reviewer 1: The project is based on images which is out of the scope of the course. Reviewer 2: I think that the process of data collection will be hard/ not sure to obtain data
46	Student		No	Accident Severity Prediction	Maybe	Classification	Yes		3.75		3.00		3.17		3.50		13.42	
38	Company professional	Burl Monadi		Algerian News Knowledge Graph & Insights Mixer	Yes	Classification, Clustering	Yes		3.00		2.83		3.83		3.67		13.33	Reviewer 1: This is an interesting project, but it should be modified to avoid the use of intensive NLP methods, as they are outside the scope of this course. Reviewer 2: NLP is out of the scope of the course
36	Student			Cancer Risk & Air Pollution Analysis	Yes	Classification, Clustering, Association rules	Yes		4.67		3.42		3.80		2.17		13.36	Reviewer 1: The project will be very important if the target data is secured from algerian hospitals and Cancer patients association Reviewer 2: Seems out of scope
39	Company professional	Dochow360		Deploying LONIC as the Standard Reference for Medical Laboratory Exams in Algeria (XIRKONIOS)	Yes	sort (linkage) with fuzzy matching, rule-based ranking, and tight clus	Yes		2.83		3.00		3.67		3.67		13.17	Reviewer 1: Seems out of scope Reviewer 2: Ontology is out of the scope of this course
46	Student		No	Fake news detection	Yes	Classification	Maybe		3.33		3.67		3.33		2.83		13.17	
52	Student		Yes	University Restaurant Food Preference Prediction	Yes	Classification, Anomaly detection, Regression	Yes		4.33		2.67		3.00		3.17		13.17	Reviewer 1: I like this project, but the project holder should be innovative in data collection Reviewer 1: Absence of data
53	Student		No	Course recommendation system	Yes	Classification, Anomaly detection, Regression	Maybe		4.33		3.17		2.75		2.83		13.08	Reviewer 1: I'm not sure that camera images can be handled in the data mining course Reviewer 2: Seems out of scope and too advanced for this course
1	Company professional	i car corporation Data center		Intelligent Transport Analytics: Mining Streaming Data from Public Road Cameras	Yes	on, Clustering, Association rules, Anomaly detection, Regression, Sta	Yes		3.08		2.50		3.83		3.50		12.92	Reviewer 3: Time fixed for the project is not enough for such advanced topics. Furthermore, applying clustering on data recorded from cameras
10	Student		No	Diabetes Prediction	Yes	Classification	No		4.67		3.67		2.33		2.17		12.83	Reviewer 1: The project will be valuable if it uses real Algerian data; however, it relies on preprocessed data from Kaggle, I do not see its importance. Reviewer 2: Many similar public work exists on the internet Reviewer 3: Many works already exists for the same purpose
34	Student		No	YouTube Influencer Lifestyle Prediction	Yes	Clustering, Regression	No		4.17		3.67		3.17		1.83		12.83	
54	Student		No	User Activity Analysis and Behavior Prediction	Yes	Classification, Clustering, Anomaly detection, Regression, Time Series, M	Yes		4.00		3.00		3.00		2.83		12.83	Reviewer 1: I'm wondering how a large amount of data will be collected. Reviewer 2: Project is unclear
37	Student		No	Medicine Side Effects & Substitutes Analysis	Yes	Classification, Clustering, Association rules	Yes		4.50		3.33		2.67		2.17		12.67	
49	Student		No	Data Mining of Oligodon Results for Element Interaction Patterns	Yes	Association rules	Yes		4.33		3.17		2.67		2.50		12.67	Reviewer 1: Similar work have been done last year
6	Professor			Data-driven Dynamic Facility Layout for Time-Varying Production Flows	Maybe	Classification, Clustering, time series	Maybe		3.67		3.08		3.58		2.17		12.42	
55	Student		Yes	Sentiment Analysis of Social Media Posts	Yes	Classification	Maybe		3.67		3.08		2.83		2.83		12.42	Reviewer 1: Just find a way to collect the data
43	Student		Yes	Predicting cancer from patient's primary diagnosis	Yes	Classification, Clustering, Association rules, Anomaly detection	Yes		4.17		3.33		2.83		2.00		12.33	Reviewer 1: Source of data is not mentioned Reviewer 1: Out of scope of the course Reviewer 2: Out of Scope of the course
4	Company professional	Gemra		Assessing Chunk Quality through Data Mining Approaches for Multimodal RAG	Yes	y detection, other approaches such as pattern recognition, and featu	Yes		3.00		3.00		3.33		2.83		12.17	Reviewer 3: Out of the scope of the course
56	Student		Yes	Enhancing News Feed Ranking Using Author Expertise in Social Media	Yes	Ranking/Recommendation	Maybe		4.00		2.75		2.67		2.67		12.08	Reviewer 1: I'm wondering how a large amount of data will be collected. Reviewer 2: Project is unclear
32	Student		Yes	Credit Card Fraud Detection Project	Yes	Classification, Clustering, Anomaly detection	Yes		4.50		2.83		2.42		2.17		11.92	Reviewer 1: Many similar public work exists on the internet. Reviewer 2: Duplicated Reviewer 3: Duplicated
13	Student		No	Hit or Miss: Predicting Global Success of Video Games	Yes	Classification, Association rules	No		4.67		4.33		2.33		0.50		11.83	Reviewer 1: Would be interesting if you don't rely solely on Kaggle data Reviewer 2: Data should be provided for Algerian content Reviewer 3: not clear as project?
29	Student		Yes	Emotions and their impacts in our productivity	Maybe	Classification, Regression, Correlation	Yes		4.50		2.17		2.67		2.50		11.83	Reviewer 1: Interesting but they need to make sure that the data can be collected
48	Student		Yes	Fantasy Premier League best team prediction	Yes	Regression	Maybe		4.83		4.00		2.17		1.33		11.83	Reviewer 1: Would be interesting if you don't rely solely on Kaggle data Reviewer 2: Would be better to use algerian datasets
16	Student		Yes	Predicting Employee Attrition And Performance Using HR Analytics	Yes	Classification, Regression	Yes		4.83		3.67		1.67		1.50		11.67	
35	Student		Yes	Fraud Detection in Online Transactions	Yes	Classification, Clustering, Anomaly detection	No		4.50		3.33		2.25		1.50		11.58	Reviewer 1: Many similar public work exists on the internet Reviewer 2: Duplicated
18	Student		Yes	Heart Disease Prediction From Clinical Data	Yes	Classification, Association rules	Maybe		4.83		4.00		1.50		1.00		11.53	Reviewer 1: It would be better to target algerian data many public already exist in the literature

Project ID [1]	Proposer Type	Company Name	For students projects: Do you allow other teams to apply for your project?	Project Title	Data Obtainable?	Data Mining Method	Related to Algeria?	⚡	Average Relevance (8)	⚡	Average Feasibility (9)	⚡	Average Added Value (9)	⚡	Average Algorithm Correct (4)	⚡	Final Mark (20)	All Reviewer Comments
9	Company professional	Bomare company (Stream)		BMA Application: TV Fault Detection and BMA Automation App	Yes	Classification, Clustering, Anomaly detection	Maybe		2.33		2.83		3.00		3.00		11.17	Reviewer 1: The computer vision is out of the scope of the course Reviewer 2: Out of scope of the course Reviewer 3: Out of scope
23	Student		No	Spamify: Email Spam Detector	Yes	Classification, Clustering	Maybe		4.00		4.00		1.83		1.33		11.17	Reviewer 1: Many similar public work exists on the internet
5	Student		No	Proving Adam AGI capabilities	Yes	ad execution strategies from the Adam's reinforcement learning tree	Maybe		2.83		3.17		2.67		2.33		11.60	Reviewer 1: The project is not well defined Reviewer 2: Objectives are unclear Reviewer 3: Unclear project
16	Student		No	PromoSense: Analyzing the Impact of Discounts on Purchase Behavior	Yes	Association rules, Regression	No		4.50		4.00		2.00		0.50		11.00	Reviewer 1: Would be interesting if you don't rely solely on Kaggle data Reviewer 2: Unclear project Reviewer 3: same
28	Student		Yes	Early Detection of Parkinson's Disease	Maybe	Classification	Maybe		4.00		3.50		2.17		1.33		11.00	Reviewer 1: Many similar public work exists on the internet Reviewer 2: It would be better to target Algerian dataset (audience)+ How could the symptoms be explained ?
29	Student		Yes	UCDP Conflict (predicted wars to avoid)	Yes	Clustering, Regression	Maybe		4.17		3.00		2.83		1.33		10.89	
40	Student		No	League of Legends' Team Creator	Yes	Association rules	No		4.33		3.33		2.17		0.33		10.67	
19	Student		Yes	Global Terrorism Database (GTD)	Yes	Classification, Clustering, Association rules	Maybe		4.00		3.08		2.17		1.33		10.58	
14	Student		Yes	Income Insight: Factors Influencing Earnings	Yes	Classification	No		4.67		4.00		1.33		0.33		10.33	Reviewer 1: Many similar public work exists on the internet Reviewer 2: same
65	Student		No	Colon Cancer Risk Prediction Among Algerian Adults Using Data Mining Techniques	Maybe	Classification, Association rules	Yes										Late submission (not evaluated)	
66	Student		No	Anti-Fraud Detection System for Algerian E-Payment Platforms	Yes	Classification, Anomaly detection	Yes										Late submission (not evaluated)	
67	Student		No	Estim AI: Data Mining for AI Adoption Insights	Yes	Classification, Clustering	No										Late submission (not evaluated)	
68	Student		Yes	RPL-Based Attacks Detection in IoT Networks using Data Mining	Yes	Classification, Anomaly detection	Maybe										Late submission (not evaluated)
